TRACK & RESTRICT WHO GOES WHERE WITH

mySONITROL®
VERIFIED ELECTRONIC SECURITY
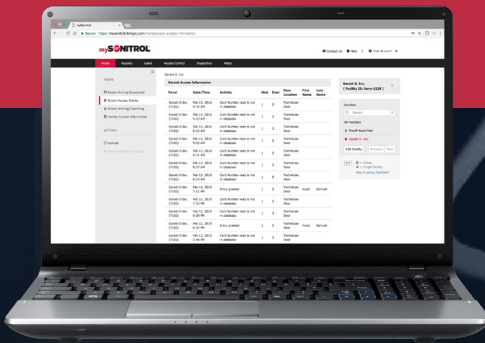

In 1990, Sonitrol was the first security company to offer as a service, "Integrated Intrusion and Central Station Managed Access Control" and we have been leading the industry ever since. Managed Access as a service is just as important today as it was 28 years ago, and some will say even it has even greater importance in today's market. For most facilities, where intrusion detection and access control are both needed, then the tightly integrated Sonitrol audio intrusion system with managed access is your best fit from both a cost and features perspective.

The key features of Sonitrol Central Station Managed Access are:

- SONIP Central Station Managed Access Control
- mySonitrol and Mobile App integration
- Integrated Audio Intrusion
- Integrated Fire Communicator
- SonaVision® Video Integration
- Elevator Control
- Doors Status via Keypad
- Lockdown/Unlock from the Central Station
- 64 doors or 128 readers if doing anti-pass back
- 20,000 card holders

Sonitrol Cloud Access delivers broad access control capabilities within a simple, intuitive, browser-based interface to conveniently secure and manage user location(s). This cloud-based solution makes access control practical and affordable for any user, regardless of technical experience or business size. Users can easily view, monitor, and report on any or all events and alarms; define multiple security roles, and access privileges for individual users.

- If your requirements call for a small 1-2 door access control system only, without intrusion, then Sonitrol Cloud Access is a great solution from a cost and ease of installation perspective.
- Sonitrol Cloud Access also has the ability to expand to an enterprise level with no limit to the number of doors or card holders.
