mySONITROL ®
VERIFIED ELECTRONIC SECURITY

Sonitrol offers complete security management with mySonitrol

See For Yourself

• Login to mySonitrol.net from any secure web browser and gain access to your security dashboard

• Run reports or schedule when you need them

• Manage the access permission levels of every employee

• View live, archived and associated video by event

• Near Real Time Access Control Events with associated video

• Includes integration to Sonitrol Mobile App

mySonitrol is a web-based security management tool that is innovative, reliable and easy to manage. With a few clicks of a mouse, you will be able to find all of the information you need in one place, from virtually anywhere, anytime you need it, via a secure web browser.

## mySonitrol offers unprecedented flexibility and control

Flexibility
With mySonitrol, you can view and manage all of your locations from a single login via the web.

Control
Add/delete users, customize Access Control features and view video cameras via internet-enabled NVR.

Choose the mySonitrol service that provides the features you need – mySonitrol Standard for intrusion alarm systems, and mySonitrol Pro for access control management and video integration.

mySonitrol offers two levels of access so you can choose the features that best meets your unique needs.

With *mySonitrol Standard*, you receive:

News & Customer Communications

- Product Information
- Latest News

Account Information

- View systems & user status
- Assign user authorization levels
- Run reports (arm/disarm information and call list)
